

**Fostering Partnerships. Scaling Innovations.
Unlocking Capital. Amplifying Impact.”**

WHO WE ARE

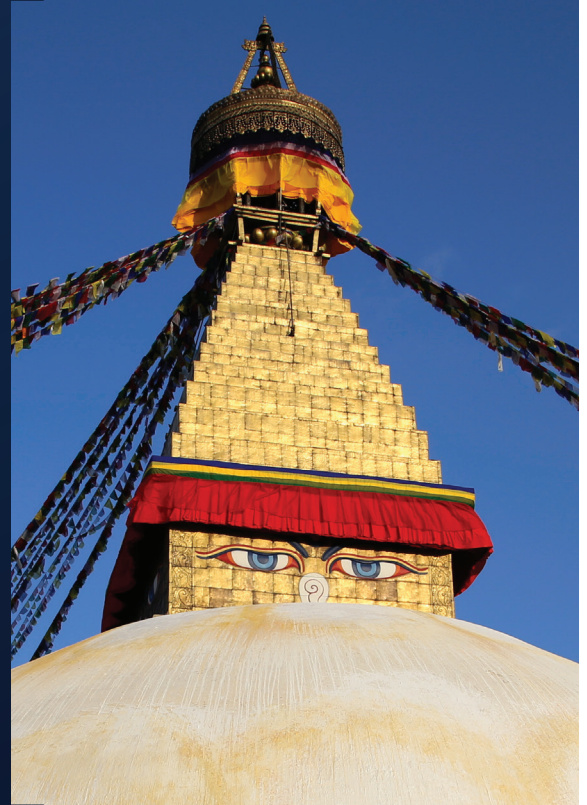

Aadyanta Advisory is a Nepal-based strategic advisory and ecosystem-building firm working at the intersection of enterprise growth, sustainable development, and systems transformation.

We help enterprises, investors, governments, philanthropies, and development partners navigate complexity, strengthen partnerships, build capability, unlock capital, and translate promising ideas into scalable, lasting impact.

Founded by practitioners shaped by experience across Nepal and global markets, Aadyanta was built on a shared conviction: that sustainable progress today must be private-sector-enabled, partnership-driven, and systems-aware.

As Nepal navigates political and economic transition, LDC graduation, rapid technological disruption, AI-driven economic shifts, and changing aid and financing landscapes, the need for institutions and enterprises that can bridge technology, talent, capital, and markets has never been greater.

That is where our work sits. Grounded in local realities and strengthened by regional and global networks, we work across sectors including technology and AI, food systems and agriculture, climate and clean energy, finance and investment, tourism, education and workforce development, governance, and enterprise growth.

WHAT WE HELP UNLOCK

Our work takes different forms depending on who we partner with—but it always starts with the same question: What will unlock durable progress here? We support partners to:

Generate Insight and Opportunity Intelligence

Research, diagnostics, ecosystem mapping, political economy analysis, market systems analysis, and opportunity identification to inform strategy, investment, and execution.

Strengthen Partnerships, Institutions, and Market Systems

Helping development partners, enterprises, government, and ecosystem actors build stronger partnerships, align incentives, deepen private sector engagement, and foster more effective public-private collaboration.

Unlock Capital and Pathways to Scale

Supporting investment readiness, blended finance, catalytic capital, investor engagement, commercialization pathways, and growth strategies for enterprises and transformative initiatives.

Build and Scale Innovation Ecosystems

Designing and supporting innovation platforms, AI and digital capability-building initiatives, startup ecosystems, technology partnerships, and enterprise growth efforts that connect local talent, markets, and global opportunities.

Shape Visibility, Narrative, and Influence

Crafting strategic communications, storytelling, convenings, and thought leadership that strengthen credibility, partnerships, and momentum.

SELECTED INITIATIVES

Our work combines systems thinking, local insight, cross-sector partnership building, and practical execution. We work closely with partners to identify opportunities and constraints, align incentives and stakeholders, strengthen institutional and enterprise capability, and build pathways to scale, sustainability, and long-term impact.

Below is a snapshot of some of our initiatives.

Reimagining Aid | Executive Retreat on Partnerships, Innovation, Capital & Systems Change

A two-day executive learning experience bringing together leaders from development, philanthropy, government, business, and investment to explore the future of development, partnership-driven approaches, innovative finance, AI, and systems change.

CARE Nepal | Private Sector Engagement Strategy & Implementation Support

Supporting CARE Nepal to strengthen institutional readiness for Private Sector Engagement (PSE), identify partnership pathways, and develop more sustainable, market-connected models.

GIZ GRAPE 2 | Finance Needs of Agri-SMEs in Nepal

Nationwide assessment of agri-SME financing needs to identify barriers, opportunities, and practical pathways for expanding inclusive agricultural finance.

Swiss Contact | Code Project

Combining labour market analysis, employer engagement, field research, and youth ecosystem data to help shape practical, market-linked digital skills pathways aligned with Nepal's evolving economy and the future of work.

CARE Nepal | Didi Bahini Business Accelerator for Girls and Youth-led MSMEs

Enterprise and skills diagnostics and market assessments for youth-led MSMEs, including digital services, with a focus on both supply- and demand-side constraints and gender barriers.

Nepal in Business (FCDO) & NAS-IT | Investment Readiness Initiative

Supporting growth-stage Nepali tech firms to strengthen governance, investor preparedness, compliance, and capital access.

U.S. Embassy Nepal | Seeding & Scaling Innovations

Strengthening Nepal's AI and tech innovation ecosystem through mentorship, ecosystem convenings, AI labs, investment readiness support, and strategic partnerships.

U.S. Embassy Nepal | Code for Impact U.S.–Nepal Tech Innovation Hackathon Series

A nationwide innovation pipeline engaging young innovators across all seven provinces to design and test technology-enabled solutions to socio-economic challenges.

Heifer Nepal | Agriculture Value Chain Financing Study

Assessing Nepal's agricultural finance ecosystem and identifying innovative financing approaches for food systems transformation and inclusive agricultural growth.

LET'S CO-CREATE

Whether you are designing a transformative initiative, exploring investment opportunities, strengthening enterprise growth, scaling innovation, fostering public-private collaboration, or looking to unlock more sustainable and scalable impact—we would be happy to explore how we can partner.

Let's build what lasts.
